

Toris CA

Hidden Utilities Feature

Toris Composite Floor Deck Ceiling Systems provide a concrete form for a structural floor while providing an acoustical/architectural ceiling underneath. This system was engineered to house various hidden utilities within the cells of the deck while providing access through removable panels along the system ribs. It is no longer necessary to expose electrical systems, wire ducts, sprinkler pipes, or strut channels when designing a facility with multiple floors. Toris Composite Floors/Ceilings allow a consistent floor to floor aesthetic while providing architectural appeal.
